

# Project 4 changes according to the web-development golden rules:

## **Cosmetic:**

- Layout consistency:
  - Add unified yellow and blue contrast theme for the website
  - Unified background for all web pages
  - Header buttons were readjusted with same contrast and theme
- Avoid Cluster:
  - Redesigned the font size hierarchies of the website (Only one H1 per page)
  - Redesigned the header per the theme, adjusted the font size and spacing within the header

## **Minor usability issue:**

- Added the time scheduling for the user appoints (user's suggestion)
- Added the picture of vehicle type to help user to make decision regarding their oil change
- Added currency type for user pricing

## **Prevent Errors:**

- Fixed several typos in the main page and user register page (user's suggestions)
- Added scheduling success messages to the user appointment page

## **Offer informative feedback:**

- User login/register success message pop up added

## **Universal usability:**

- User login/register form key board access enabled, user could just use "tab" key to register and login now.
